

LIBERTY OF THE SEAS

By the numbers

3,700,000 square feet of steel plate
 350,000 steel pieces used in the hull
 325 miles of steel profiles
 1,013 miles of weld seams
 111,000 gallons of paint
 2,200 miles of electric cables

100 miles of piping
 62,430 square feet of windows
 530 tons of water in the swimming pools
 1,400 tons of fresh water consumed each day
 713,000 gallons of fresh water generated every day
 65,000 pounds of ice cubes produced per day

Putting Liberty in Perspective

Standing upright on its bow, Liberty of the Seas would trump New York's famed Chrysler building (1,046 feet) and Paris' Eiffel Tower (986 feet).

At 154,407 the GRT of Liberty of the Seas is equal to that of Royal Caribbean International first four ships put together.

Boasting a width of 126.64 feet, Liberty of the Seas is actually wider than the White House is long (168 feet). When measured from the waterline to the top of the funnel, Liberty of the Seas towers 208 feet tall, which is approximately the same height as two Statues of Liberty, placed head to toe.

Liberty of the Seas has enough staterooms to host all, and we mean all, NFL, MLB and NBA players and coaches in one single sailing.

The Platinum Theatre seats 1,350 guests, approximately the same amount of guests housed on three 747 airplanes.

The Royal Promenade stretches longer than a football field, running 445 feet down the center of the ship.

Staterooms

Total: 1,899 · Ocean View: 1,132 (858 with balconies) · Interior: 767 (172 with Promenade View)

- Staterooms with third and fourth berths: 544 · Wheelchair-accessible staterooms: 33
- All staterooms convert to queen-size bed configuration and have private bathroom, phone, flatscreen tv, mini-bar, hairdryer, a/c.
